GENERAL COURSE INFORMATION

Implicit in this document is an agreement that you, the student, and we, the instructors, abide by the general principles laid out below.

Course objectives

The primary objective of this course is to introduce you to some key bacterial pathogens that cause disease in humans and animals, and explore the mechanisms by which these pathogens manage to survive in a hostile environment (our bodies) and cause disease and, perhaps, death.

Course description

This is a **learner-centered course** in <u>Pathogenic Bacteriology</u>, with online <u>and</u> interactive in-class elements. In the first part of the course we will take a close look at some prominent bacterial pathogens and the diseases they cause in humans and animals. Like characters in a play, bacteria have unique "personalities", and it is worth taking a look at them from this perspective. All pathogens, however, face a similar set of challenges when they set out to cause disease – they have to enter the body (human/animal/plant/amoeba), hang on to cell surfaces, or slip into cells, find food, and dodge highly efficient immune systems. In the second part of the course, we will explore the common strategies pathogens use to address these issues, and how this results in disease.

The laboratory course VSM/MIC 421b (Microbiological techniques) complements this course. You do **NOT** need to be signed up for 421b in order to attend this course.

INSTRUCTORS

Vish Viswanathan, Ph.D.	Gayatri Vedantam, PhD
Office: VSM 227	Office: VSM 303
Email: vkv@email.arizona.edu	Email: gayatri@email.arizona.edu
Office hours: Thursdays 4.00 p.m 5.00 p.m.	
OR by appointment	

Please read the FAQ section to see if a question you have about the course has already been answered. If you do send a query that has been answered in the FAQ section, we will direct you to the appropriate section in the FAQ.

Location/time: All lectures will be released online (Panopto format). <u>There will be no in-class lecture</u> <u>sessions</u>. Discussion sessions will be held in <u>Room 101, Saguaro Hall 3.30 – 4.45</u> <u>p.m. on Tuesdays or Thursdays</u> as indicated in the Syllabus.

Attendance

<u>Attendance for the discussion sessions is mandatory</u>. This class is learner-centered: active student participation is fully expected.

Course Materials: Relevant course materials and/or tasks will be available online on the course web site. Course materials, including the materials presented in class, will be released on a weekly basis as we progress through the course. You <u>are expected</u> to read and comprehend <u>all</u> materials posted in the Contents section of the D2L course site. Materials specific for graduate students taking MIC520 will be clearly marked on the D2L site. The main addition for graduate students will be in the discussion sessions – you will be assigned additional questions during this period.

Textbook: There are no 'required' textbooks for this class. This course is always a "work-inprogress": We routinely update course materials, and strive to include materials from the latest research in bacterial pathogenesis. If you are interested in a book on pathogenesis, I recommend: Bacterial Pathogenesis: a Molecular Approach, 3rd Edition by Wilson, Salyers, Whitt, & Winkler. The course is structured differently than the book, though the same general concepts are covered in both.

Course structure: The course is divided into 10 modules. Each module runs for three class periods, includeS 2 lectures + 1 discussion session. For Class 1 & Class 2 of all modules, you will perform prescribed tasks online, at your pace, within scheduled time limits. Class 3 of EVERY module is an in-class discussion session. Attendance is mandatory for all discussion sessions. Here is an example of a module:

Module 1	Date	Task	Points
Class 1	8/25/2015	Watch Lecture 1 online, Read assigned article(s)	
Class 2	8/27/2015	Watch Lecture 2 online, Read assigned article(s)	
Class 3	9/05/2015	IN-class discussion session. Attendance mandatory.	20 points
M1 Quiz		Take online within 60 hours after discussion session	20 points

<u>GRADING</u>: Grades for MIC/IMB/VSC 420 are based on (a) Self-assessment quizzes and (b) Attendance and participation in discussion sessions (and submission of discussion reports). For information regarding MIC/IMB/VSC 520, see next page.

	Each module	Number of modules	Total points
Quiz	20 points	10	200
Discussion	20 points	10	200
Total Points			400

Bases on the final percentage, students will be assigned a letter grade using the following scale. Grades are not 'curved'.

GRADE	Percentage	Corresponding Points
Α	> 90%	360-400
В	80-89.9%	320-359
С	70-79.9%	280-319
D	60-69.9%	240-279
E	< 60%	Below 239

Given the flexibility built into the course:

- There will be no make-up quizzes or discussion sessions.
- There are no opportunities for extra points. None. At all.
- There will be no negotiations for grade changes. None. At all.

If you miss a discussion session, you lose 20 points. The only exception is if you have a medical or other emergency, or a UA-approved excuse such as jury duty, for which you are able to provide an official letter from your doctor or other official – in such a case an alternate assignment will be administered and graded. If you fail to submit your quiz on time, you lose 20 points. Since quizzes are available online, there will be even less accommodation for not submitting them on time.

Grades for **MIC/IMB/VSC 520** are based on (a) Self-assessment quizzes, (b) Attendance and participation in discussion sessions (and submission of discussion reports) and (c) an open book exam at the end of the semester

	Each module	Number of modules	Total points
Quiz	20 points	10	200
Discussion	20 points	10	200
Exam	-	-	50
Total Points			450

Bases on the final percentage, students will be assigned a letter grade using the following scale. Grades are not 'curved'.

GRADE	Percentage	Corresponding Points
Α	> 90%	405-450
В	80-89.9%	360-404
С	70-79.9%	315-359
D	60-69.9%	270-314
E	< 60%	Below 269

Academic integrity

Students are expected to adhere to the student code of academic integrity (http://www.dos.web.arizona.edu). Students caught engaging in academic dishonesty including, but not limited to, cheating, plagiarism, fabrication of data and modification of data <u>will receive a failing</u> grade on the assignment, <u>and further sanctions</u> as deemed appropriate by the instructor. If you have any questions about ethics, ask the instructor.

Special needs and disability accommodations

Any student who anticipates the need for reasonable accommodations to meet the requirements of this course should contact the Strategic Alternative Learning Techniques (SALT) Center or the Disability Resource Center. The appropriate office must document the need for accommodations. If there are any questions regarding this, please set up an appointment with the instructor.

Code of conduct / classroom behavior

All students in this class will be expected to abide by The Arizona Board of Regents' Student Code of Conduct. Additionally, students are asked to set their **phones to silent** and **remove their headphones.** Students will refrain from 'texting', 'tweeting' etc during class hours.

Confidentiality of student records

See: http://www.registrar.arizona.edu/ferpa/ferpa.htm

Subject to change

Other than the grade and attendance policies, this syllabus is subject to change, with advance notice.

MIC420 Syllabus, Fall 2015 (Last update: December 10th, 2015): Note: <u>This is only a template</u>. While the overall course structure will likely not change, there <u>WILL</u> be changes to specific reading assignments & discussion topics}. For specific week-to-week updates, please refer to the D2L course site. D2L announcements override this document.

		Classes Start:	08-24-2015
	MODULE 1		
Class 1	Orientation		08-25-2015
1. 🗆	Attend: class for course orientation		
2. □	Review: (a) Course details (b) Syllabus		
3. □	Watch Lecture: Course overview: Bacterial Infectious diseases		
4. □	Read: Planet of the bacteria by Stephen Jay Gould. An old classic.		
Class 2	Bacterial infections through the ages		08-27-2015
1. 🗆	Watch Lecture: Infectious diseases through the ages		
2. 🗆	Read: Lowe 2008: Causality & infections: Koch, Hill, & Crohn's. Lancet	Infect Dis 8: 720	0–26
Class 3	Discussion: Helicobacter & Koch postulates		09-01-2015
1. 🗆	Attend discussion session & complete assigned tasks	20 points	
2. □	Complete : Quiz 1 {Available 09/01/15 5 p.m. to 09/04/15 5 a.m.}	20 points	
	MODULE 2		
Class 4	G+ cocci: Staphylococcus		09-03-2015
1. 🗆	Watch Lecture: The genus Staphylococcus, virulence factors, disease.	•	
2. □	Read: McKenna M. Man Vs. MRSA. 2012. Nature 482:23-25.		
3. □	1 <u>520</u> Read: Lowy F.D. 2011. NEJM 364(21):p1987)		
		Labor Day :	09-07-2015
Class 5	G+ cocci: Streptococcus		09-08-2015
1. 🗆	Watch Lecture: The genus Streptococcus, virulence factors, disease.		
2. 🗆	Read: DuToit, 2014. Pneumococci find a sugar daddy. Nat Revs Microb	iol. 12(9):596	
3. □	<u>520</u> Read: A key step towards a safer Strep Vaccine 2014. (goo.gl/EZH)	<u>TMN</u>)	
Class 6	Discussion: Smart strategies to target Staph virulence factors		09-10-2015
1. 🗆	Attend discussion session & complete assigned tasks	20 points	
2.	Complete : Quiz 2 {Available 09/10/15 5 p.m. to 9/13/15 5 a.m.}	20 points	
	MODULE 3	•	
Class 7	G+ rods: Bacillus		09-15-2015
1.	Watch Lecture: Bacillus, virulence factors, disease,		
2. □	Read: Anthrax susceptibility varies in human populations (Stanford 2012	2 http://goo.gl/E	ZHTMN)
3. □	520 Read: Recruiting anthrax toxin to deliver cancer drugs (2015: http:/	//goo.gl/fpiYcO)	,
Class 8	G+ rods: Clostridia		09-17-2015
1 . □	Watch Lecture: The genus Clostridia, virulence factors, disease.		
2. 🗆	Read: DeVrieze 2013. The promise of poop. Science. 341(6149):954-7.		
3. □	520 Read: Rupnik 2015. C. difficile bacteriotherapy. N Engl J Med. 16;3	372(16):1566-8.	
Class 9	Discussion: Gram-positive spore-forming rods, Nosocomial CDI		09-22-2015
1. 🗆	Attend discussion session & complete assigned tasks	20 points	
2. 🗆	Complete: Quiz 3 {Available 9/22/15 5 p.m. to 9/25/15 5 a.m.}	20 points	
MODULE 4			
Class 1	Mycobacterium sp.		09-24-2015
1 . □	Watch Lecture: Mycobacterium sp., virulence factors, disease		
2. 🗆	Read: Humphries, 2013. A sleeping giant. Nature 502:S14-S15		
3. □	520 Read: Gruber, 2015. Delamanid Case study. Nat Medicine 21(2): 10	03	
Class 1	Basic phylogenetics & bacterial diversification		09-29-2015
1. 🗆	Watch Lecture: Pathogen genome analysis 101		
2. 🗆	Read: Gibbons 2013. On the Trail of Ancient Killers. Science 340:1278		
3. 🗆	1 <u>520</u> Read: Jones 2014. Salmonella Paratyphi Genome. Nat Rev Genet	15: 642	

Class 12 Discussion	10-01-2015
1. Attend discussion session & complete assigned tasks	20 points
2. Complete : Quiz 4 {Available 10/01/15 5 p.m. to 10/04/15 5 a.m.}	20 points
MODULE 5	
Class 13 Non-Enteric G- rods 2: Pseudomonas & Legionellae	10-06-2015
1. D Watch Lecture: Psuedomonas sp. & Legionella sp.: Virulence fac	tors & disease.
2. Read: Cotter. 2011. Molecular syringes scratch the surface. Natur	e 475:301
3. D 520 Read: Barnabie & Whiteley. 2015. Iron & P. aeruginosa Vs. S.	. aureus. J Bact. 197 (14): 2250.
Class 14 Non-enteric G- cocci: Neisseriae sp.	10-08-2015
1. D Watch Lecture: The genus <i>Neisseria</i> , virulence factors, disease.	
2. Read : Groopman J. Sex & the Superbug. 2012. New Yorker. <u>http:/</u>	//goo.gl/kubQj9
3. <u>520</u> Read: Yong E. 2014. The long war against Iron Pirates. <u>http://</u>	goo.gl/p7Rcme
Class 15 Discussion	10-13-2015
1. Attend discussion session & complete assigned tasks	20 points
2. Complete : Quiz 5 {Available 10/13/15 5 p.m. to 10/16/15 5 a.m.}	20 points
MODULE 6	
Class 16 Enteric G- rods: Escherichia coli pathotypes.	10-15-2015
1. Watch Lecture: Escherichia coli pathotypes, virulence factors, dis	ease.
2. Read: Karch et al. 2012 . Lessons from 2011 O104 outbreak. Emb	0 Mol Med 4:841-848.
3. Discrete Strate Callaway/Sheridan. 2015. Smarter arrows in food safet	y quiver. PNAS. 112(40):12230
Class 17 Enteric G- rods (contd): Salmonella & Versinia	10-20-2015
2. Dead: Harth 2015. In Africa, a deadly Salmonolla strain takes held	h. https://goo.gl/cm/NQ1
2. D Read. Hartin. 2015. In Amica, a deadly Saimonena strain takes not	1. <u>https://g00.g//cm41191</u>
Class 18 Discussion	10-22-2015
1. Attend discussion session & complete assigned tasks	20 points
	00 1 /
2. Complete : Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.}	20 points
2. Complete : Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7	20 points
2. Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter	20 points 10-27-2015
2. Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter 1. Watch Lecture: Vibrio & Helicobacter, virulence factors, disease. 2. Beach Mallail In 2015. Draming in generative shelars via	20 points 10-27-2015
 Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter Watch Lecture: Vibrio & Helicobacter, virulence factors, disease. Read: McNeil Jr. 2015. Promise is seen in inexpensive cholera variable of the sector activates stomach stop 	20 points 10-27-2015 ccine. <u>http://goo.gl/a2Tvw4</u> m.colle. <u>https://goo.gl/a4d6p7</u>
 2. Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter 1. Watch Lecture: Vibrio & Helicobacter, virulence factors, disease. 2. Read: McNeil Jr. 2015. Promise is seen in inexpensive cholera vara 3. 520 Read: Smuga-Otto. 2015. Helicobacter activates stomach ste 	20 points 10-27-2015 ccine. <u>http://goo.gl/a2Tvw4</u> m cells. <u>https://goo.gl/o4q6p7</u> 10-29-2015
2. Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter 1. Watch Lecture: Vibrio & Helicobacter, virulence factors, disease. 2. Read: McNeil Jr. 2015. Promise is seen in inexpensive cholera var 3. 520 Read: Smuga-Otto. 2015. Helicobacter activates stomach ste Class 20 Antibiotics & Antibiotic resistance 1. Watch Lecture: Antibiotics & antibiotic resistance	20 points

Complete: Quiz 7 {Available 11/03/15 5 p.m. to 11/06/15 5 a.m.} MODULE 8 Class 22 Signal-sensing & Virulence gene expression 1. Watch Lecture: Signal-sensing & Virulence gene expression 2. Read: Kennis 2007. Brucella light-sensing via two-component syst 3. 520 Read: Viswanathan 2013 Shigella RNA thermometer 	20 points
 2. Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter 1. Watch Lecture: Vibrio & Helicobacter, virulence factors, disease. 2. Read: McNeil Jr. 2015. Promise is seen in inexpensive cholera vara 3. 520 Read: Smuga-Otto. 2015. Helicobacter activates stomach ste Class 20 Antibiotics & Antibiotic resistance 1. Watch Lecture: Antibiotics & antibiotic resistance. BMC Biology 3. 520 Read: Kåhrström CT. 2013. Mismatch excels when ampicillin Class 21 Discussion 1. Attend discussion session & complete assigned tasks 2. Complete: Quiz 7 {Available 11/03/15 5 p.m. to 11/06/15 5 a.m.} MODULE 8 Class 22 Signal-sensing & Virulence gene expression 1. Watch Lecture: Signal-sensing & Virulence gene expression 2. Read: Kennis 2007. Brucella light-sensing via two-component syst 3. 520 Read: Viswanathan 2013 Shigella RNA thermometer 	20 points 10-27-2015 ccine. http://goo.gl/a2Tvw4 m cells. https://goo.gl/o4q6p7 10-29-2015 action & resistance 11:51 runs low. Nat Revs Micro 11: 11-03-2015 20 points 20 points 11-05-2015 tem Veteran's day:11-11-2015
 2. Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter 1. Watch Lecture: Vibrio & Helicobacter, virulence factors, disease. 2. Read: McNeil Jr. 2015. Promise is seen in inexpensive cholera vara 3. 520 Read: Smuga-Otto. 2015. Helicobacter activates stomach ste Class 20 Antibiotics & Antibiotic resistance 1. Watch Lecture: Antibiotics & antibiotic resistance. BMC Biology 3. 520 Read: Kåhrström CT. 2013. Mismatch excels when ampicillin Class 21 Discussion 1. Attend discussion session & complete assigned tasks 2. Complete: Quiz 7 {Available 11/03/15 5 p.m. to 11/06/15 5 a.m.} MODULE 8 Class 22 Signal-sensing & Virulence gene expression 1. Watch Lecture: Signal-sensing & Virulence gene expression 2. Read: Kennis 2007. Brucella light-sensing via two-component syst 3. 520 Read: Viswanathan 2013 Shigella RNA thermometer 	20 points 10-27-2015 ccine. http://goo.gl/a2Tvw4 m cells. https://goo.gl/o4q6p7 10-29-2015 action & resistance 11:51 runs low. Nat Revs Micro 11: 20 points 20 points 20 points 11-03-2015 tem Veteran's day:11-11-2015 11-10-2015
 2. Complete: Quiz 6 {Available 10/22/15 5 p.m. to 10/25/15 5 a.m.} MODULE 7 Class 19 Enteric Gram negatives: Vibrio & Helicobacter 1. Watch Lecture: Vibrio & Helicobacter, virulence factors, disease. 2. Read: McNeil Jr. 2015. Promise is seen in inexpensive cholera variation in the second strest of t	20 points 10-27-2015 ccine. http://goo.gl/a2Tvw4 m cells. https://goo.gl/o4q6p7 10-29-2015 action & resistance 11:51 runs low. MODULE 9			
Class 25	Bacterial secretion systems	11-17-2015	
1. 🗆 V	Vatch Lecture: Bacterial secretion systems		
2. □ R	Read: Scott & Friel. 2013. Tit for tat – a bacterial counterattack system.	Small things considered.	
3. □ <mark>5</mark>	20 Watch: Mekalanos on T6SS. https://www.youtube.com/watch?v=aC	QIU5C∨sIjw	
Class 26	Phages and bacteria virulence	11-19-2015	
1. □ V	Vatch Lecture: Phages & Bacterial Virulence		
2. □ R	Read: Youle & Schaechter. 2008. Small things considered: SaPI1 partic	cles	
3. □ <mark>5</mark>	20 Read: Youle. 2013. Small things considered: SaPI1 particles		
Class 27	Discussion (TCE)	11-24-2015	
1. 🗆 A	ttend discussion session & complete assigned tasks	20 points	
2. 🗆 C	complete: Quiz 9 {Available 11/24/15 5 p.m. to 11/27/15 5 a.m.	20 points	
Thanksgiv	ving: No Classes	11-26-2015	
	MODULE 10		
Class 28	Innate immunity & Inflammation	12-01-2015	
1. 🗆 V	Vatch Lecture: Innate immune responses to bacterial infections.		
2. □ R	Read: Wilhelm. 2011. Tangled NETs of the immune system. Max Plance	ck Research	
3. □ <mark>5</mark>	20 Read: Viswanathan 2013. What tangled webs we weave. Gut Micro	obes 4:3, 179-180	
Class 29	The human microbiome	12-03-2015	
1. □ V	Vatch Lecture: Human microbiome and its role in health and disease		
2. □ R	Read: Wallis. 2014. Bacteria & Obesity. Scientific American.		
3. □ C	Optional Read: Scott. 2014. NYT. My No-soap, no-shampoo, bacteria-ri	ch hygiene experiment	
Class 30	Wrap-up discussion	12-08-2015	
1. 🗆 A	ttend discussion session & complete assigned tasks	20 points	
2. 🗆 C	Complete : Quiz 10 {Available 12/08/15 5 p.m. to 12/11/15 5 a.m.}	20 points	
READING	DAY: No Classes	12-10-2015	
FINAL EX	AM	None
